PORTFOLIO 2026

Xavier Camarasa.

Software developer building tools that real businesses use every day.

STUDYING	Software Design with AI & Cloud Computing — TUS, Ireland
LOOKING FOR	Internships & graduate roles

9

projects in 6 industries

PROFILE

A developer who listens first.

I study Software Design with AI and Cloud Computing at TUS in Ireland. Alongside my degree I've built software for real clients in Spain — a real-estate agency, a sauce factory, a physiotherapist and a local bar — and a marketplace of my own.

What I enjoy most is the moment a client stops calling me because they can do it themselves. That's why almost everything I build comes with an admin panel, an export button or a clear handover.

I'm looking for a team where I can keep turning real business problems into working software.

EDUCATION

BSc Software Design with AI & Cloud Computing — TUS

FINAL-YEAR PROJECT

AI-assisted manufacturing drawings in Autodesk Inventor

EXPERIENCE

Freelance client projects in Spain + own B2B product

LANGUAGES

Spanish / English

AVAILABLE FOR

Internships, graduate roles, freelance

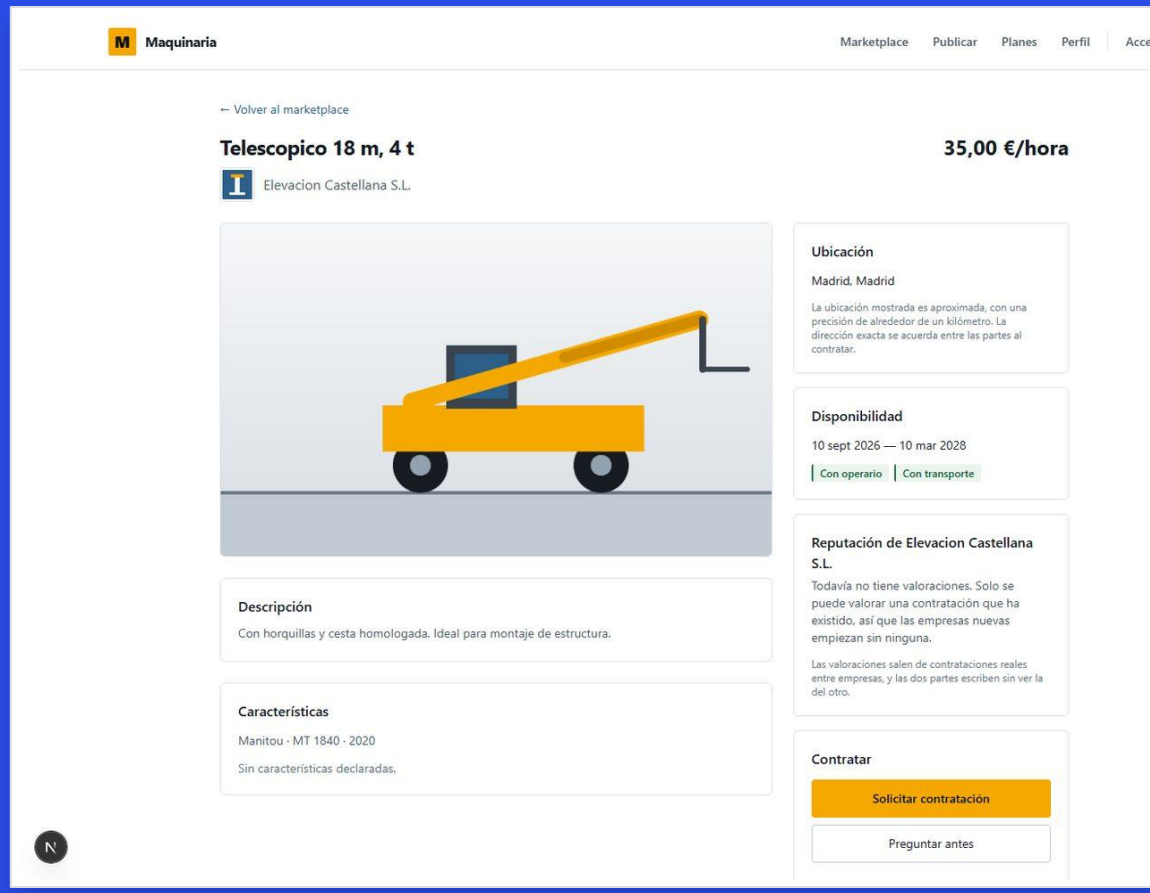

01

Featured product

The project I'm proudest of — designed, built and tested end to end.

Maquinaria / the product

Under the hood / engineering decisions

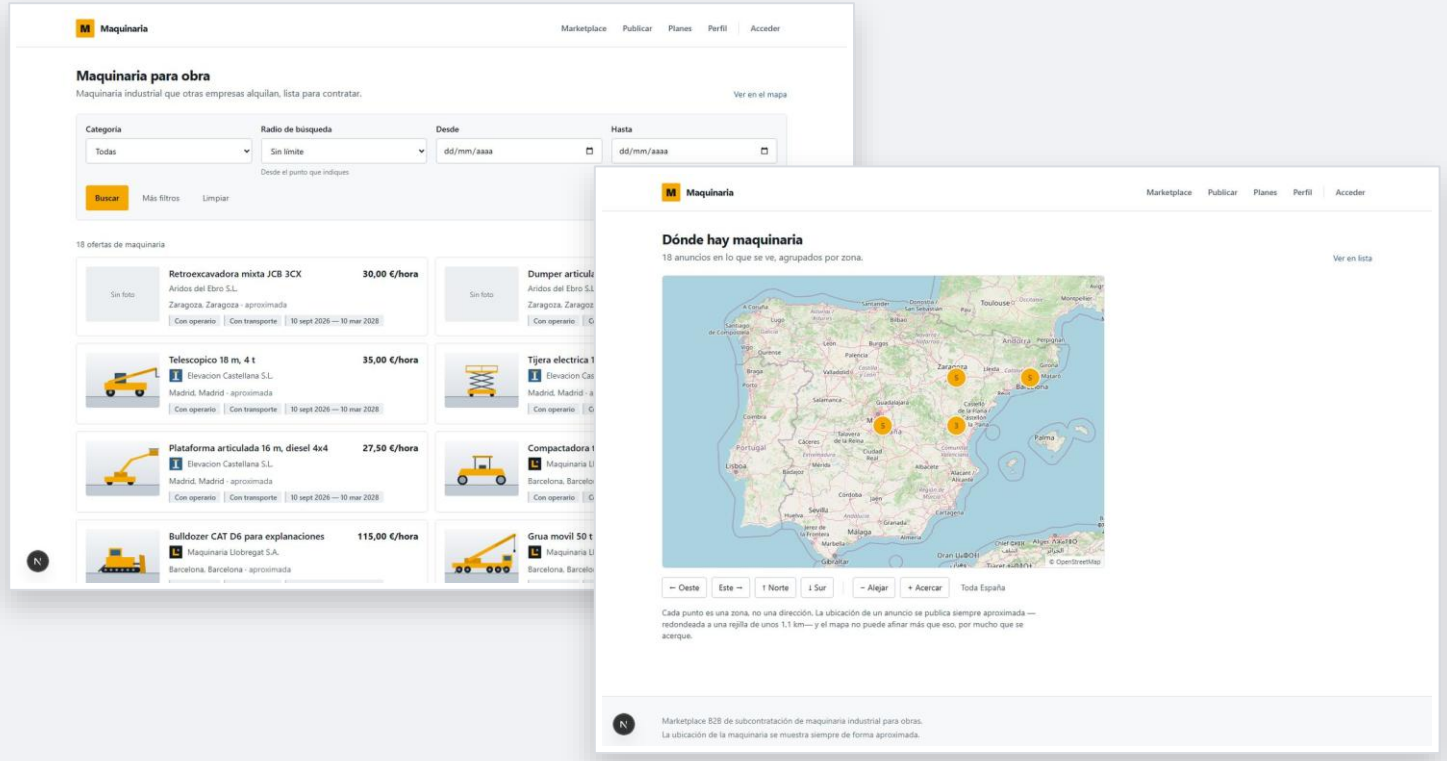

B2B MARKETPLACE / CONSTRUCTION

Maquinaria

Construction companies rent idle machinery to each other — with documents verified before anyone can hire.

TypeScript | Next.js | REST API | PostgreSQL | OpenStreetMap | Testing

01 PROBLEM

One company has an excavator standing still for three weeks; another, 40 km away, needs exactly that — and rents from a distributor at three times the price.

02 SOLUTION

Search by category, dates and radius or on a map. The platform checks each machine's paperwork and freezes the terms into a contract once both sides agree.

03 RESULT

A complete product with an interactive demo: eight test personas can publish, negotiate and hire for real, end to end.

BY THE NUMBERS

1,406

passing automated tests

120

API endpoints

40

database migrations

MAQUINARIA / UNDER THE HOOD

Built to be trusted, not just used.

The database refuses double bookings, not an if.

A “check, then insert” breaks when two requests arrive at once. A date-range constraint in PostgreSQL means that of eight simultaneous bookings, exactly one wins.

Reviews are written blind.

Neither side sees the other's review until both are in (or 14 days pass), so the first rating can't anchor the second.

No shared deal, no conversation.

Messaging another company requires a listing or booking that links you, checked on the server. Locations are always rounded to a ~1 km grid.

02

Client work

Four businesses, four different problems — each one solved with the client, not just for them.

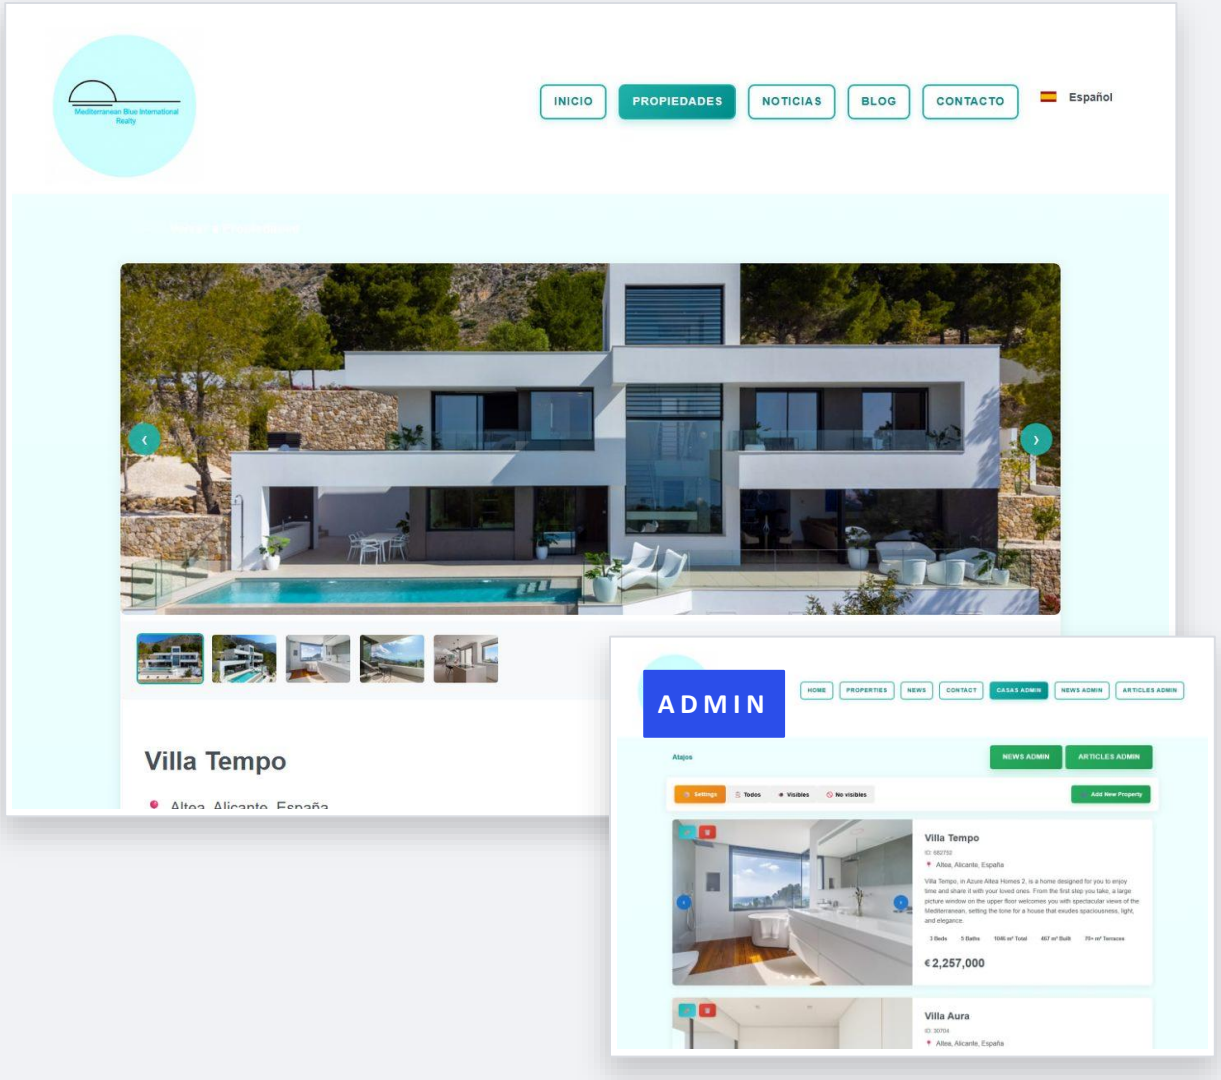

Mediterranean Blue / real estate

DK Tegoria Salsas / food manufacturing

Bar Castelló / hospitality

Physiotherapist / health

REAL ESTATE / COSTA BLANCA

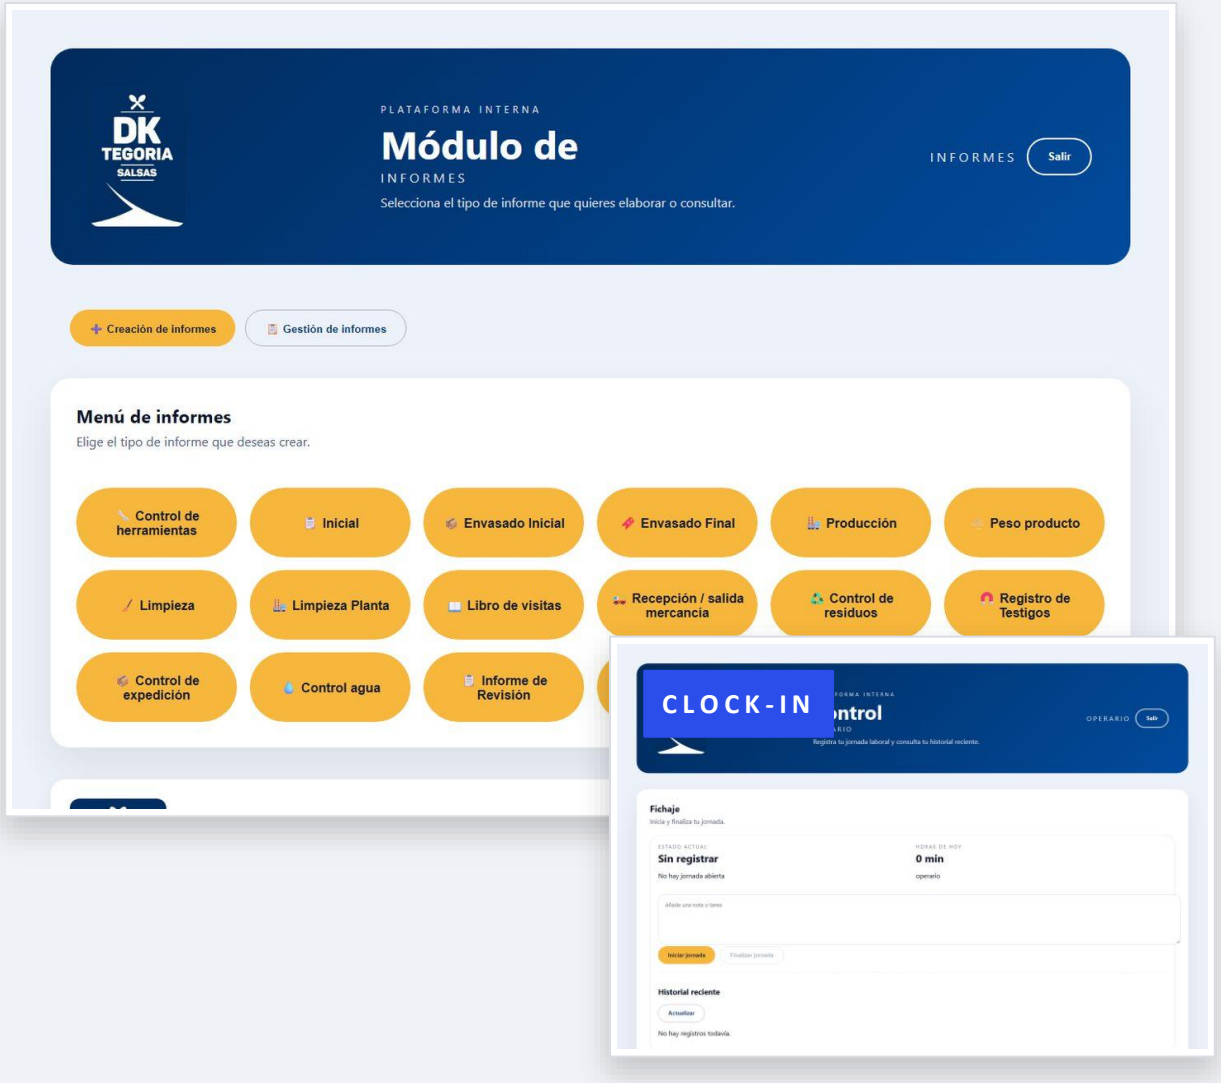

Mediterranean Blue Realty

A bilingual website for an international agency selling luxury villas to buyers abroad.

NEED	Reach foreign buyers; update listings without a developer
BUILT	Listings, galleries, news & blog in ES/EN + admin panel
FEATURES	Bilingual / responsive / GDPR cookies

OUTCOME

The agency runs its own content day to day.

FOOD MANUFACTURING / INTERNAL TOOL

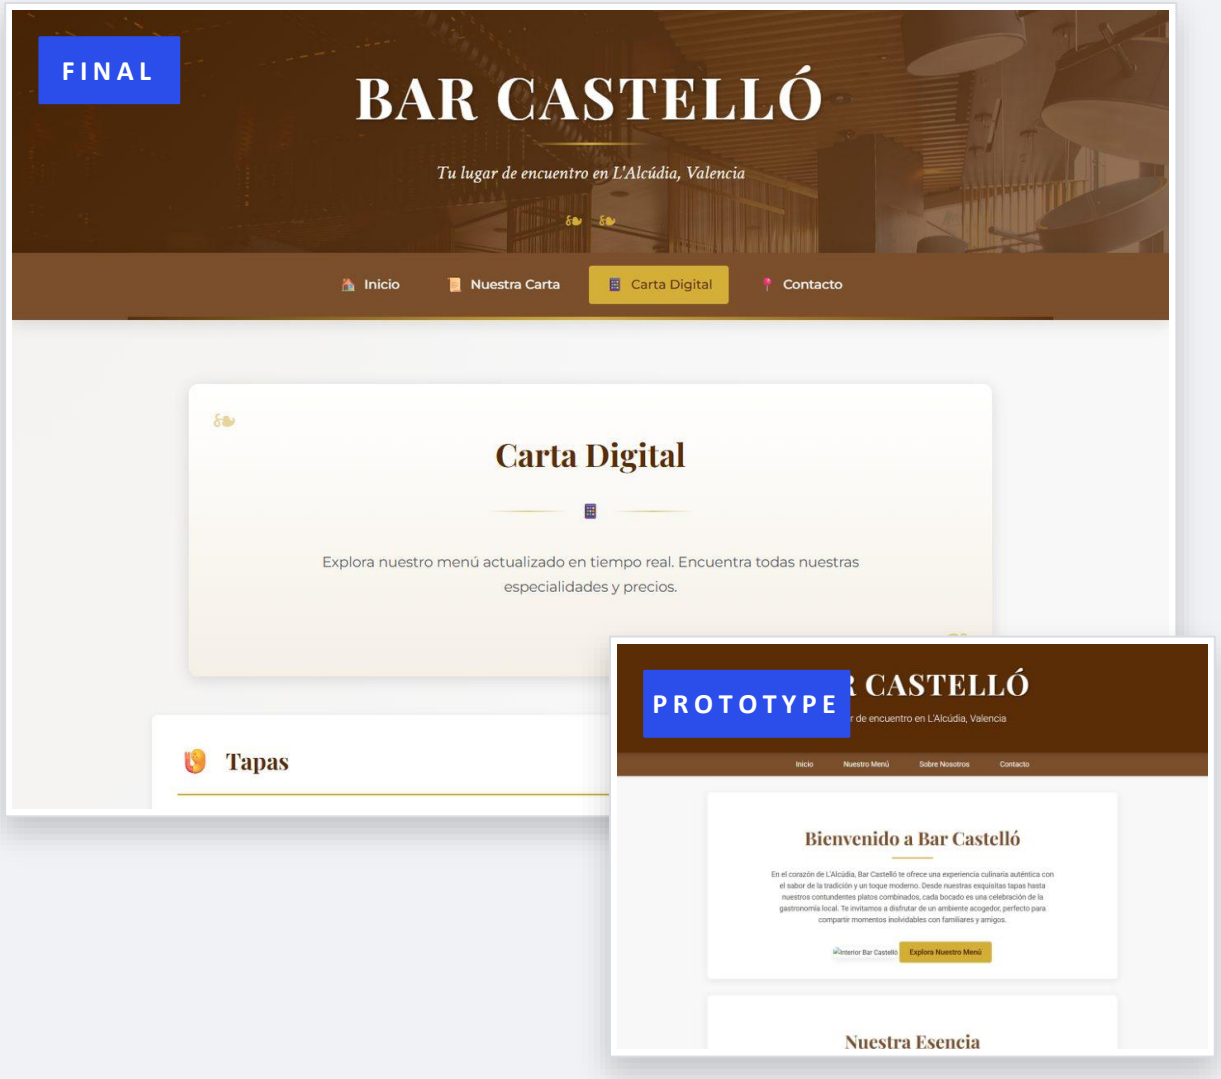

DK Tegoria Salsas

An internal platform that replaced paper for working hours and quality control.

NEED	Hours and quality checks lived on paper
BUILT	Clock-in/out, 16 report types, one-click Excel export
FEATURES	Role-based login / pH, cleaning, waste, water reports

OUTCOME

Less paper, fewer errors, data ready for any inspection.

HOSPITALITY / L'ALCÚDIA, VALENCIA

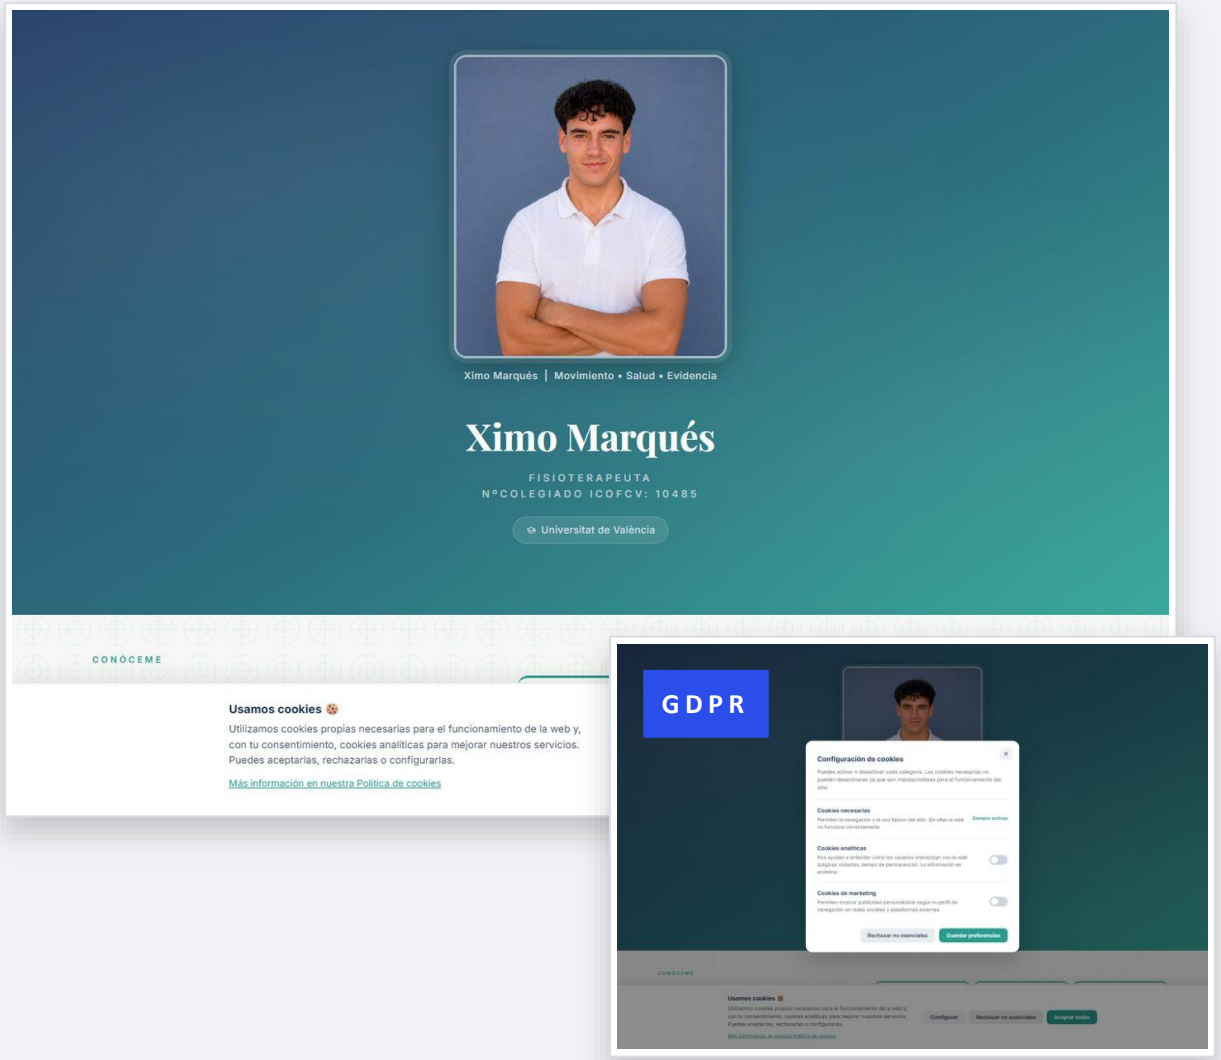

Bar Castelló

From a quick prototype to a live digital menu the owner updates without touching code.

NEED	A menu that changes every week, kept up to date online
PROCESS	Prototype → owner feedback → final product
BUILT	Website + real-time digital menu + admin panel

OUTCOME

New dishes and prices go live in seconds.

HEALTH / PERSONAL BRAND

Physiotherapist website

A personal-brand landing page for Ximo Marqués, a registered physiotherapist.

NEED	A professional online presence that builds trust fast
BUILT	Mobile-first landing page with clear sections
FEATURES	GDPR cookie banner: accept, reject or configure

OUTCOME

A credible first impression, legally sound from day one.

03

Mobile & academic

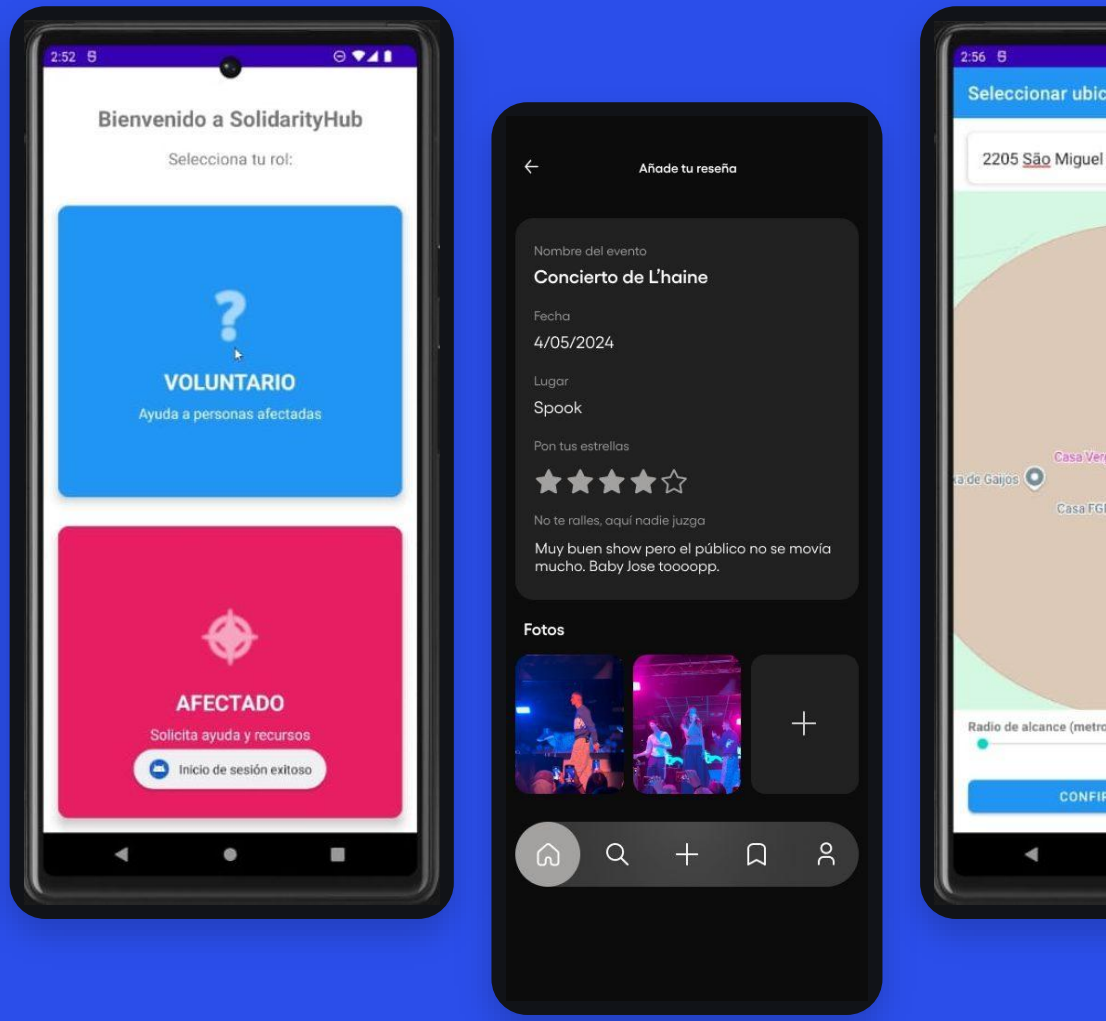

Apps for phones, data for decisions and a final-year project at the edge of engineering and AI.

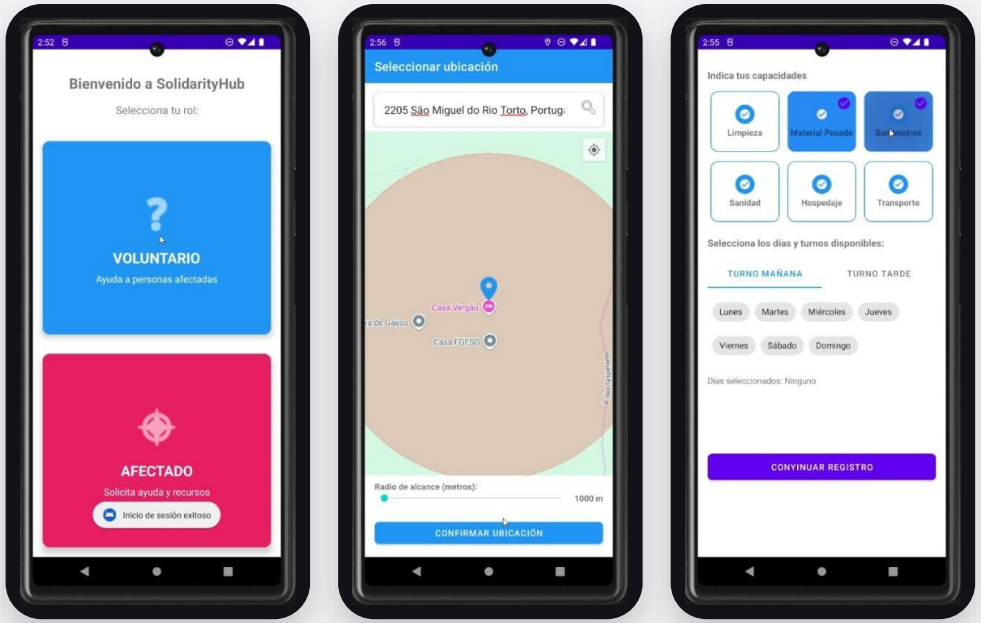

SolidarityHub / Android

Live-music review app / mobile

Cost of Living Visualizer / data viz

Final-year project / Autodesk Inventor + AI

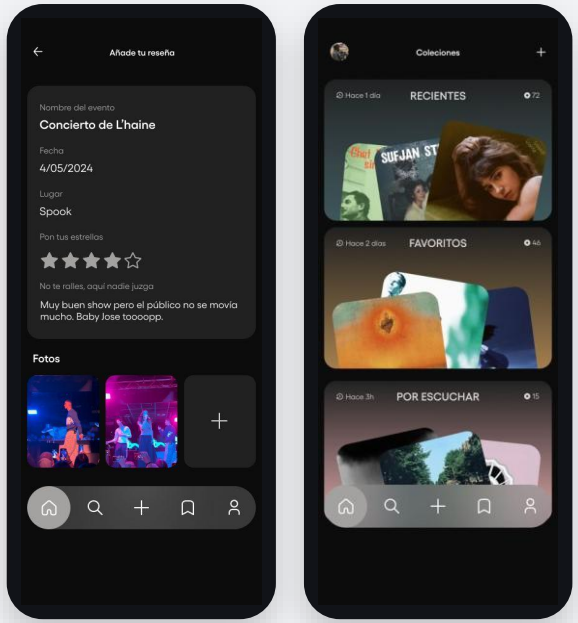

ANDROID / EMERGENCY RESPONSE

SolidarityHub

Inspired by the DANA floods in Valencia: connects volunteers with affected people — role, location and radius, what you can offer and when, and requests on a map.

Android | Geolocation | Matching

MOBILE / MUSIC & SOCIAL

Live-music review app

Review concerts and albums with star ratings and photos, build collections like “Favourites” and follow friends — in a dark UI designed for one-handed use.

Mobile UI | Social | Ratings

ACADEMIC WORK / TUS

Data, AI and project management.

DATA VISUALISATION / TEAM OF 4

Cost of Living Visualizer

An interactive dashboard comparing wages with rent, groceries, energy and transport across European countries — so people thinking of moving abroad can see what they would actually have left each month.

Python | pandas | Streamlit | Plotly | Teamwork

FINAL-YEAR PROJECT / ENGINEERING + AI

AI-assisted drawing generation for Autodesk Inventor

Automatically generating and evaluating manufacturing drawings from 3D parts. Delivered so far: proposal, SRS and a feasibility study with PERT estimates, a risk register and MoSCoW scoping.

Inventor API | SRS | Feasibility | Risk register

Listen first, then build.

01

Listen

Start from the business problem — the paperwork, the idle machine, the weekly menu — not from a tech stack.

DK TEGORIA / MAQUINARIA

02

Prototype

Show something clickable early and let the client react. Cheap changes now beat expensive ones later.

BAR CASTELLÓ

03

Build & test

Front end, back end, database and tests in one pair of hands, with key rules enforced where they can't be bypassed.

1,406 TESTS / MAQUINARIA

04

Hand over

Admin panels and exports so clients run their own tools — no developer needed for day-to-day changes.

MEDITERRANEAN BLUE / BAR CASTELLÓ

SKILLS

What I bring to a team.

Front end	HTML & CSS / JavaScript / TypeScript / React / Next.js / Responsive design / Accessibility
Back end & data	REST APIs / SQL / PostgreSQL / Migrations / Authentication & roles / Python / pandas
Mobile	Android / Maps & geolocation / Mobile UI design
Data & AI	Streamlit / Plotly / Data cleaning / Dashboards / AI-assisted tooling
Engineering practice	Git / Automated testing / Architecture decisions / GDPR & cookies / Cloud deployment
Professional	Client communication / Requirements & SRS / Feasibility & risk analysis / Teamwork / Spanish & English

THANK YOU

Let's build something useful.

Open to internships, graduate roles and freelance projects.
